Vintage	2024
Soil Type	Schist, iron rich Granite
Alcohol by Volume	14%
pH	3.53
Total Acidity	5.5 g/L
Residual Sugar	3 g/L
Barrel Type	French

In the Vineyard

The Syrah is planted on schist soils and the vineyard carried 2,5 tons/Ha, which lead to a wine that was deeply concentrated. The grenache is planted on red soils which is rich in iron, these parcels give the final blend great perfume and elegance.

In the Cellar

The Syrah was 100% whole bunch fermented and was aged in big 500Litre barrels. The grenache was destemmed. The grenache was aged in small barrique. The wine was blended together after months in oak. One pump over was done on both vineyards.
